

FCAT TESTING PARENT LINK MESSAGE

This is a special message from the Broward County Public Schools. There are state rules and regulations regarding the administration of FCAT testing in our schools. Some of them relate to the prohibition against student's having in their possession, on their person or within their reach any device that records or transmits voice, text or photographic images. The devices include – but are not necessarily limited to – cell phones, cameras, computers and other devices that are capable of recording and/or transmitting information and pictures. Any student found to have in their possession or within their reach such devices will be disqualified from testing; their test materials will be invalidated; and they will be subject to disciplinary action. Please ensure that your children know and understand these state rules and regulations regarding FCAT testing and comply with them. Thanks for your time.
